

# Composite GRP Garage Doors To Be Proud Of

Strong on Security • Superior Real Timber Effect • High Performance

# Welcome *to CDC Garage Doors*

**A**t CDC Garage Doors, we believe a garage door should complement the character of the home it belongs to. As an independent British manufacturer, we specialise in beautifully crafted composite GRP (Glass Reinforced Polyester) garage doors, combining traditional craftsmanship with modern materials designed to stand the test of time.

Lightweight yet remarkably strong, composite GRP offers outstanding durability without the common drawbacks of traditional materials. **It will not rust, warp or rot**, making it an ideal choice for garage doors that must perform reliably year after year.

Every door we produce is handmade to order and available in a carefully considered range of designs to suit both classic and contemporary homes. Choose from a crisp gloss white finish or authentic timber-effect woodgrain, with a selection of natural wood tones and colour finishes to complement your property.

Behind the beautiful finish lies meticulous engineering. Each door is constructed around a robust metal and timber framework, fully encapsulated within the structure to ensure exceptional strength and rigidity.

We take great pride in the doors we make. Our experienced craftsmen approach every door with patience, skill and attention to detail, ensuring that each one leaving our workshop reflects the high standards we have built our reputation on.

# What makes our composite GRP garage doors exceptional?

Designed for strength, style and long-term performance, our GRP composite garage doors combine authentic timber aesthetics with the durability of modern materials.

## Strong on Security

A robust internal framework provides strength and rigidity for dependable day-to-day protection.

## Authentic Timber Appearance

Beautifully moulded woodgrain finishes recreate the look of real timber without the upkeep.

## Built to Last

Durable composite GRP construction resists rust, warping and rot, ensuring long-term performance in all weather.

## Low Maintenance Living

Unlike traditional timber doors, composite GRP requires minimal upkeep to keep it looking its best.

## Made to Order

Every door is individually manufactured to ensure a precise fit and a finish that complements your home.

## Made in Britain

Made right here in Britain, where quality is built in from the start.

# Why Choose Composite GRP Over Timber Garage Doors?

Maintenance	Composite GRP	Timber
Painting	✔ No painting required; colour embedded in	✘ Yearly painting required to maintain appearance
Sealing	✔ Sealed surface resistant to moisture and weather	✘ Requires periodic sealing to prevent water damage
Repair	✔ Minimal repairs; resistant to warping and rot	✘ May require repairs for warping, rot, and damage
Pest Control	✔ Resistant to pests such as termites and insects	✘ Vulnerable to pest infestation and damage
Weather Resistance	✔ Withstands harsh weather conditions	✘ Susceptible to damage from moisture and sunlight

# Engineered for your complete peace of mind

What makes GRP doors so desirable is their strength at the core, delivering dependable security, long-term durability and total confidence, every single day.

**AUTOMATION**

All our garage doors are suitable for automation, giving you the convenience and luxury of remote opening and also increased security for your property.

## → Engineered Strength, Built-In Security

A reinforced composite structure delivers exceptional rigidity, helping to resist impact, forced entry and daily wear without compromise.

## → Precision Fit for Total Protection

Composite GRP doors maintain their shape over time, ensuring a consistent, secure seal within the frame, with no warping, twisting or gaps developing.

## → Advanced Locking Compatibility

Designed to integrate seamlessly with multi-point locking systems, anti-snap cylinders and automated security features for enhanced protection.

## → Resilient by Nature

Resistant to corrosion, weather and environmental stress, Composite GRP maintains both its strength and appearance, even in the harshest conditions.

## → Security Without Compromise on Style

Authentic woodgrain finishes and refined detailing deliver the appearance of traditional timber, with none of the weaknesses.

# Designed to retain warmth, Built for efficiency.

Energy Efficient  
Composite GRP  
Garage Doors

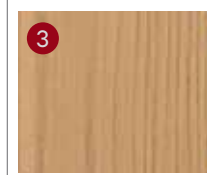

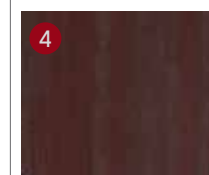

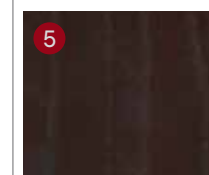

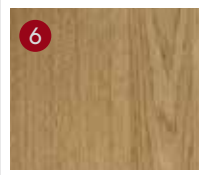

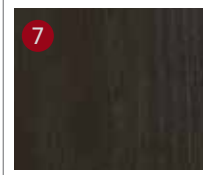

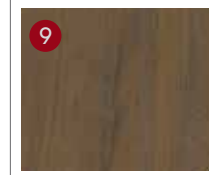

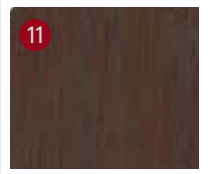

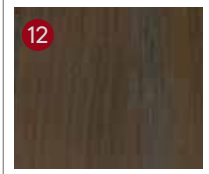

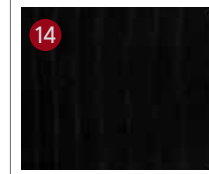

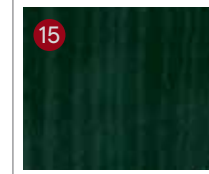

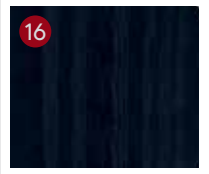

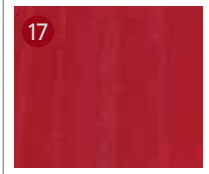

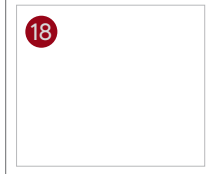

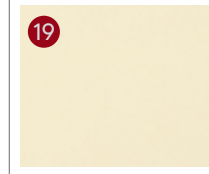

Our garage doors are constructed using a durable multi-layer composite GRP (glass reinforced plastic) system, designed to deliver excellent thermal performance without the need for an insulated core. GRP naturally acts as an effective barrier to heat transfer, helping to reduce thermal bridging and maintain more stable temperatures within the garage.

Our garage doors help reduce heat transfer, keeping garages warmer in winter and cooler in summer. This is especially beneficial for attached garages, where maintaining a more stable temperature can help protect adjoining living spaces.

We spend considerable time and take great care reproducing the beautiful look of natural timber by hand applying the wood tone finish to our doors.

As with natural timber, some colour variation can occur over the face of an individual door and also between doors.

 1 WHITE	 2 MAGNOLIA	 3 BLEACHED OAK	 4 RED MAHOGANY	 5 DARK MAHOGANY
 6 LIGHT OAK	 7 DARK OAK	 8 IRISH OAK	 9 HONEY BEECH	 10 TEAK

01 - 14 Standard Woodgrain Colours

15 - 17 Premium Woodgrain Colours\*

18 - 19 Standard Smooth Gloss Colours  
(only available in the Richmond range of doors)

\* Please see our price list for details.

We can match **ALL RAL COLOURS**, with many other colour ranges available on request.

*Please tell us if two doors of the same colour are to be fitted in close proximity to each other so that any colour variations can be kept to a minimum.*

Please note when trying to colour match garage doors with other UPVC products always check a colour sample first. For example Rosewood GRP doesn't match Rosewood UPVC where Dark Mahogany GRP is a closer match.

GRP COMPOSITE

# 4 Panel Up and Over Garage Doors

All of our up and over doors are suitable for fitting into a timber frame or we can supply doors in a steel frame. Frames are available in a range of colour finishes.

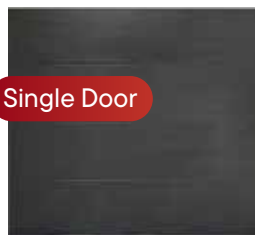

# The Blandford

With its sharp four-panel design and smooth GRP finish, the Blandford door brings a modern, no-fuss aesthetic to your home. Strong, weather-resistant and easy to maintain, it's built to look good and perform effortlessly year after year.

The Blandford Garage Door comes in a range of **solid colours** or choose any other RAL colour with our colour match service.

GRP COMPOSITE

# Side Hinged Garage Doors

All of our side hinged doors are manufactured pre-framed with a steel frame. Frames are available in a range of colour finishes.

# Timeless side-hinged garage doors, engineered for everyday convenience.

The CDC range of traditional GRP **side hinged garage doors**, alongside a matching Verwood-style **personnel door**, delivers the perfect balance of heritage design and modern practicality. Combining the charm of classic side-hinged operation with the reliability of a tried-and-tested system, this range offers a **smarter, more user-friendly** solution for today's homes.

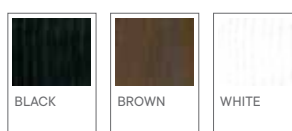

Every door is **handmade to order** and finished to an exceptional standard. Built using durable GRP panels mounted onto individual steel frames, each door is **engineered to prevent distortion** over time. An additional flow coat is applied to the rear of every door, enhancing both durability and overall aesthetic quality.

Designed with everyday use in mind, each door comes **fully equipped as standard**. This includes **heavy-duty steel hinges**, a pair of solid garage door stays, a centre stile for enhanced security, **weather seals for year-round protection**, and a **Euro deadlocking latch**. Black lever handles are fitted both inside and out, and all doors are **supplied pre-fitted** within their frames for **straightforward installation**.

Functionality is just as considered as form. Doors are manufactured with equal-sized leaves and open outwards, **maximising clear internal space within the garage**. As standard, the right-hand leaf (when viewed externally) opens first, with a left-hand opening option available on request.

For added personalisation, a range of glazing options is available across the Betchworth, Cobham and Richmond designs, allowing you to tailor the look to suit your home.

All side-hinged and personnel doors should be ordered using the overall external frame dimensions, ensuring a precise fit and seamless installation.

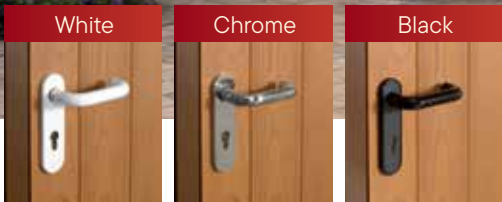

Steel Frame Colours

All of our side hinged doors are manufactured pre-framed in a steel frame.

# CDC Garage Doors Guarantee

Guarantees are subject to the conditions set out below:

1. During the comprehensive 2 year guarantee CDC undertake to repair or replace (at its discretion), and without charge, products or components which have suffered any form of manufacturing defect. Claims must be notified within 3 days of delivery or within a reasonable time after discovery of the defect.

2. Products covered by these guarantees must have been purchased through an authorised CDC distributor or as original equipment attached to a newly built dwelling.

3. The warranties shall apply to normal use only. Normal use constitutes no more than 5 operations (open / close cycles per day).

4. The warranties offered apply to the CDC product only and no consequential damages will apply no matter how caused.

5. No liability will be accepted as a result of normal wear and tear, incorrect storage, incorrect handling, faulty installation, incorrect use or wilful damage.

6. Claims under this guarantee must be made through the original supplier and accompanied by relevant documentation indicating the date of purchase (e.g. receipt).

7. CDC maximum liability shall be the original purchase price inclusive of V.A.T. at the rate.

8. Any product which is subject to a claim:

I) Must have been correctly installed in accordance with the installation instructions supplied and thereafter properly maintained by a suitably experienced engineer on a regular basis.

II) Must have the manufacturer's reference number still intact.

III) Must not have been modified in any way.

9. Claims will not be accepted where the claim is due to:

I) Impact or mechanical damage suffered during or following installation e.g. scratches, indentations, scuffs or other surface abrasions.

II) Damage caused by contact with any form of caustic, abrasive or corrosive substance, bird droppings, fire, smoke, floodwater, salts, or abnormal atmospheric pollution.

10. This guarantee excludes normal wear and tear on such items as cones, cables, spindles, lock cylinders, hinges or springs.

CDC composite doors are individually hand crafted products manufactured to specific customer orders. Due to the nature of the product and the hand finishing process used they may occasionally display small blemishes which do not detract from the overall appearance of the product. These are regarded as being within tolerance when such blemishes are not visible to the naked eye when viewed from a distance of 3 meters. Similarly woodgrain effect products will, like the natural material, display colour variations across their surface and colour will vary from door to door. Ordering doors to match helps to reduce this variation but will not eradicate it entirely.

Size and Deflection - the natural curing process does affect the ultimate product size and a tolerance of +6mm on both height and width is deemed acceptable. Doors in the open position may display a vertical deflection of up to 6mm per liner meter.

Translucency - may vary slightly when viewed from the inside on a bright day due to the variation in laminate thickness. This does not represent a manufacturing defect and overall performance is not affected.

Door Cleaning - periodically clean the door panel using warm water and a microfibre cloth, allow to dry naturally. Never use detergent, abrasive, caustic or solvent based cleaners as these may damage the door surface. Bird droppings should be removed immediately as these can be particularly caustic. If doors become dirty or dusty, use a good quality PH neutral car shampoo, then rinse off with water.

Top and Bottom Rails and End Styles - may vary in height or width between doors of the same style depending on size ordered. This is to enable us to cater for your particular size of door. Should you have any concerns please contact CDC before placing an order.

The Corporate Door Company's policy is one of continuous improvement and we reserve the right to change the specification or withdraw any products without prior notice.

All details are correct at time of going to press, May 2026, errors and omissions excepted.
