Novoroll 77 and 55 insulated roller doors strong and efficient

Automated, insulated roller doors from Novoferm are constructed from 77mm or 55mm double walled aluminium laths filled with CFC free insulating foam - an ideal solution for those who want to improve the appearance and gain space in their garage.

Safety

Certified to the high safety requirements and performance characteristics of European Standard EN 13241-1, all Novoferm Insulated Roller Garage Doors are fitted with a full NovoShield cover to prevent accidental finger entrapment and to cover the door curtain. In the event of an obstacle impeding the door entrance the Safety Edge will stop and return the door to the open position.

Convenience

An ideal solution for people who want to gain extra space in their garage, requiring only 300mm x 300mm of head room space. Opening vertically so you can park your car up close to the garage door and push button automation makes it so easy to open and close your garage door.

Where headroom is especially tight, the Novoferm 55 requires only 205mm of headroom and is now available up to 2.8 metres wide and 2.4 metres high.

Insulated

The insulated aluminium profiles provide a thermal and acoustic barrier, which could reduce your energy bills, reduce your carbon footprint and provide noise reduction.

Security

Manufactured with built in autolocks. When the door is closed a spring clamp device holds the door down tight.

Novoferm 77 door features

- White polyester painted 90mm guides
- White 300mm Novoshield Full box
- Novoroll hard wired control safety system
- Two 2-channel hand transmitters

Novoferm 55 door features

- White 65mm guides
- White 205mm Novoshield Full box
- Novoroll hard wired control safety system
- Two 2-channel hand transmitters

Insulated laths provide both a thermal and acoustic barrier. Weather seals keep whatever is on the outside... outside!

NovoShield

Supplied and finished in white as standard colour, shields the user from accidental finger entrapment and provides an attractive finish to the door curtain.

Control System

An interior light is provided within the self contained control box.

IMPORTANT SAFETY TIP

Always buy a garage door that complies fully with EN12453 - Safety in use of power operated garage doors **...and avoid finger entrapment!**

Novoferm Insulated Roller Garage Doors comply with EN12453 - Safety in use of power operated garage doors, by means of the NovoShield box cover which covers the operating mechanism of the door curtain.

Manual Override

A connector and crank handle are supplied as standard, so your door can be opened, from inside, even during a power cut.

Guide Rails

Guide rails made from aluminium profile with a white polyester powder coated finish.

Safety Edge

Supplied as standard. At the bottom edge of your door is an emergency sensor which will stop and reverse when the door is in operation, if it senses an obstruction.
